To: All Prospective Contractors

RE: Engineering Services for Landfill, Disposal Site and Waste Tire Site Remediation, DRR13017

Addendum No. 2 To the Request for Qualifications (RFQ) Method DRR13017

The following questions were received during the Questions and Answers period.

- Q41. Bond Information (Section E in Attachment A) asks a notarized statement form the bonding company be included. This usually is tied to a bonding capacity in actual dollars. Please advise what the range is of bonding capacity that your agency is expecting.
- A41. The contractor is not required to be bonded. Therefore, Attachment A, Section E has been removed from this RFQ.
- Q50. On Page SOQ-7 of Attachment A is a requirement for bonding. Typically, contractors are required to be bonded; whereas consultants are almost never required to be bonded. Can CalRecycle clarify that it does intend for its consultants to be bonded for the duration of this contract?
- A50. The contractors/consultants are not required to be bonded. Therefore, the requirement for bonding referenced in Attachment A has been removed.

All other terms, conditions, and requirements of this RFQ will remain the same.

If you have any questions relating to this RFQ process, please contact me by e-mail at contracts@calrecycle.ca.gov.

Sincerely,

{Original Signed By}
